📖 Overview

This interactive, practical and focused course provides a grounding in: the fundamentals of project management; project initiation; risk and change management; estimating and scope definition; procurement; document control; planning and scheduling; work breakdown structures and cost control; progress monitoring and forecasting; and jobsite management.

Learners are taught through a series of modules, each of which consists of: a virtual classroom workshop that includes theory and practical exercises; a topic specific assignment; and a team assignment based on a simulated engineering project.

Why Learn with 20/20?

As the largest independent provider of project management training in the UK, we are here to support and guide you through professional training. 20/20 care about your development as a project professional and will help you and your team achieve new qualifications.

Virtual Classroom Delivery

The virtual classroom is a fully immersive and interactive experience, taught by a fully qualified facilitator. The learners undertake an assignment in which they apply the skills and knowledge learnt in the virtual classroom in the context of an industrial simulation. This brings the learning to life and reinforces how to apply the skills.

Who Should Attend?

This 9 month training course is ideal for those new to and moving into project control. It provides a formal qualification in project control evidencing a full understanding of the project control environment.
